

The IUI Opportunity Plan

The affordable, high-quality fertility treatment option from RMA of Connecticut

This represents a significant reduction in the total cost for three cycles of IUI with oral medications.

Like many advanced medical procedures, infertility treatment can be costly. To help make sure that our patients can access the high-quality care they need at the most affordable prices possible, RMA of Connecticut offers **The Opportunity Plan** – an important service and payment option exclusively available to our patients who do not have insurance coverage for infertility treatment.

The Opportunity Plan at RMA of Connecticut

In most cases, couples who are having trouble conceiving and achieving a successful pregnancy are treated with ovulation induction and artificial insemination. These procedures are among the most widely used and successful treatment options in reproductive medicine.

With The Opportunity Plan, patients at RMACT who do not have any infertility insurance coverage pay one price for up to three cycles of ovulation induction with oral medications and intrauterine insemination.

How The Opportunity Plan works

- You will be treated with up to three cycles of ovulation induction and intrauterine insemination with oral medications for a fee of **\$5,720**. This represents a significant reduction in the total cost for three cycles of IUI with oral medications. The IUI Opportunity Plan includes all cycle monitoring (blood work and ultrasounds), sperm washes, intrauterine inseminations (two per cycle) and the injection necessary for ovulation timing. If you achieve a successful pregnancy at any stage during this treatment, the fee is non-refundable.
- You can withdraw from The Opportunity Plan at any time. If you choose to withdraw from the Plan after starting treatment, you will be refunded:

» After beginning the 1st cycle:	\$1,900
» 2nd cycle:	\$1,000
» 3rd cycle:	\$ 0 (no refund provided)
- If the RMACT clinical staff determined you are not a good candidate for The Opportunity Plan based on medical and laboratory findings, you will be withdrawn from the program and will receive:

» After beginning the 1st cycle:	\$2,700
» 2nd cycle:	\$1,400
» 3rd cycle:	\$ 0 (no refund provided)
- Costs associated with the fertility work-up/checklist, baseline blood work and ultrasound, sonohysterosalpingogram (SHG), outside monitoring, or medical treatment associated with an unsuccessful cycle (treatment for a miscarriage, ectopic or biochemical pregnancy) are not included.

In most cases, patients who fail to become pregnant following three cycles of IUI with oral medications should consider treatment with In Vitro Fertilization (IVF)¹. RMA of Connecticut also offers The IVF Opportunity Plan for patients who want an affordable option for high-quality treatment involving IVF.

Find out if The IVF Opportunity Plan is right for you. To learn more, contact a Financial Service Representative at RMACT at 203 750-0400.
